## **DETAILED ACTION**

## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-5 and 20-24, drawn to select a log deleting management database from a menu; inputting a password; displaying types of the log deleting management database if the input password is correct; and recording at least one of a new telephone number, a method of dialing the new telephone number, and a method of recording the new telephone number when the new telephone number record is selected from the log deleting management database, classified in class 455, subclass 410.
  - II. Claims 6-10, 14-16, 25-29 and 33-35, drawn to determine whether a telephone number received with a voice call is stored in a phonebook; displaying said received telephone number on a display section of said mobile telephone; detecting telephone numbers stored in a log deleting management database; determining whether said received telephone number is included in the telephone numbers stored in the log deleting management database; recording said received telephone number in a recently received number list and then performing a communication function, if the received telephone number is not present in the log deleting management database; searching for a method of recording said number, if said number is present in the log deleting management database; recording said number in a secret received number list; and performing a communication function, if the method of recording said number is for

recording in the secret received number list, classified in class 455, subclass 412.1.

- III. Claims 11-13, 17-19, 30-32, 36-38, 39-45 and 46-52, drawn to input a telephone number; pressing a "send" key on the mobile phone; determining whether said input telephone number is present in a phonebook of the mobile phone; displaying said input telephone number on a display section of said mobile phone; detecting telephone numbers stored in a log deleting management database; determining whether said input telephone number is included in the telephone numbers stored in the log deleting management database; recording said input telephone number, if said input telephone number is not present in the log deleting management database; and dialing function; searching for a method of dialing said number, if said input telephone number is present in the log deleting management database; and performing a dialing function while concealing said input telephone number and a caller's name, if the method of dialing said number is caller concealment, classified in class 455, subclass 415.
- 2. Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are distinct, each from the other because of the following reason: invention I which discusses to select a log deleting management database from a menu; *inputting a password;* displaying types of the log deleting management database *if the input password is correct*, while

Art Unit: 2688

invention II which discusses to determine whether a telephone number received with a voice call is stored in a phonebook; displaying said received telephone number on a display section of said mobile telephone; detecting telephone numbers stored in a log deleting management database; determining whether said received telephone number is included in the telephone numbers stored in the log deleting management database, and while invention III which discusses to input a telephone number; pressing a "send" key on the mobile phone; determining whether said input telephone number is present in a phonebook of the mobile phone; displaying said input telephone number on a display section of said mobile phone; detecting telephone number is included in the telephone numbers stored in the log deleting management database; determining whether said input telephone number is included in the telephone numbers stored in the log deleting management database. Note each group has different functions, i.e., different parameters, for detecting telephone number stored in a log deleting management database. Thus, the search area of group I is different from the search area of group II, as well as group III.

- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 4. A telephone call was made to Kendall Peter on January 13, 2006 to request an oral election to the above restriction requirement, but the examiner was unable to reach the attorney.
- 5. Application is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143)

Application/Control Number: 10/658,205 Page 5

Art Unit: 2688

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the

inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

currently named inventors is no longer an inventor of at least one claim remaining in the

application. Any amendment of inventorship must be accompanied by a request under 37 CFR

1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dai A Phuong whose telephone number is 571-272-7896. The

examiner can normally be reached on Monday to Friday, 9:00 A.M. to 5:00 P.M..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, George Eng can be reached on 571-272-7495. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
